

TREE/BRUSH PRODUCTS RECYCLED

Free Mulch Available

A good portion of the brush, limbs and trees that are collected by the City are chipped to recycle the products into mulch that is used in the City's Parks and Recreation program however; because the amount of mulch that is produced is more than can be utilized by the municipal department, the City offers mulch to the general public at no cost. The mulch must be picked up by the consumer at the City's storage complex located at 613 West Highway. The mulch pile is located just inside the entrance to the property. The City urges those individuals who are picking up mulch at the location to use caution as that site is subject to numerous truck traffic.
